W. C. T. U. WILL INTRODUCE BILL FOR POLICE MATRON

Committee From Temperance Organization Inspects Jail and Prison--Sentenced Female Prisoners Greatly in Need of Employment.

The need for a police matron was again voiced yesterday at the monthly meeting of the W. C. T. U. held yesterday afternoon in the Central Union church parlors. The W. C. T. U., further put itself on record for this improvement in police methods by favoring the draft of a bill which will be presented to High Sheriff Henry for his consideration, to the Governor and finally to both branches of the legislature.

Mrs. J. M. Whitney, the president, presided. She presented the matter of prison work in an able manner. She stated that she and Mrs. W. W. Hall had an interview, by appointment, with High Sheriff Henry last Saturday. The High Sheriff received them courteously and gave them full information on the subject at hand. He manifested a favorable attitude toward the project. He conducted them to Oahu Prison where they saw the sixteen women prisoners. Three of these, sentenced to imprisonment for life, live apart from the remaining thirteen. The latter have their cells in a corridor where they remain for the most of the day, apart from all other prisoners. Once a day they are taken into the yard for exercise.

Both Mrs. Whitney and Mrs. Hall were struck with the fact that the women are idle most of the time. The High Sheriff stated that no work is laid out for the women as in the case of the men. Mrs. Whitney and Mrs. Hall felt that they really suffered from lack of work. The High Sheriff had stated that he had had cloth torn up into strips by them, which they braided into mats and carpets which are to be found all over the prison. But even this did not suffice, and therefore during the greater part of the day they merely folded their hands. Among the female prisoners there were a few Hawaiians, but the most of the them were Porto Ricans and Japanese. This corridor seemed to be dominated by a Porto Rican woman of extremely bad character, whose influence the W. C. T. U. committee thought operated badly on her companions. There were frequent quarrels among them. The High Sheriff said there was real need for a woman warder over the female prisoners.

He thought that if a police matron was provided for she could spend a part of the day at the Oahu Prison overseeing work laid out for them and to do in kindly, womanly way for her charges. It was during the night time when female prisoners were generally brought to the police station. As a usual thing the arrests were mainly for drunkenness. Mrs. Whitney said that this was the time when a police matron's services would be most desired. Their hair was usually down, their clothes in disorder and they stood in need of a woman's ministrations. Sometimes a woman, arrested for theft, needed to be searched, an occupation clearly not for a man to have under the circumstances.

In the early part of the meeting attention was called to the Sunday services at the Prison, and the meeting decided to endeavor to take part in them, at least once a month, by co-operation with the Y. M. C. A.

ARTESIAN WATER IN PLACE OF RESERVOIR SUPPLIES

Honolulu, T. H. March 21st, 1905.

Editor Advertiser: I was glad to see in this morning's paper a short article headed "Water Getting Bad" and your note of warning in regard to its effect on the public health.

It is a matter of surprise to me to see so little comment on the water supply of Honolulu,—especially when one considers how important a matter the water supply of any community is.

We are just now experiencing a period of drought and low water in the reservoir. The bottoms of the reservoirs which consist of decaying vegetable and animal matter are being run into the supply pipes with occasionally a fish or frog added, and this stream of nastiness is offered to the consumers.

It undoubtedly would make a good fertilizer, but when it comes to be used for domestic uses, it is about as dangerous to have a rattlesnake for a bed fellow. I have lived a good many years in this

community and have experienced just such conditions as exist now.

In 1895 when the first pump was installed to pump water for this city from artesian wells, it was shown beyond a doubt that this city could be supplied with good, clean water from an almost inexhaustible supply, and every pump added to the system since then has shown the same results.

The surprise is that in the face of this, there are plans entertained just now, and most likely will be handled by our present legislators, to extend the mud puddle system, for which hundreds of thousands of dollars are to be expended for water rights and condemning land, when the interest on this money would run all the additional pumps needed.

It would be interesting to know how much the taxpayers have already paid for expert services on the subject of gravity water supply, filtering, etc., etc., for Honolulu. All that I can see in evidence of these services are the receipts of their handsome bills.

Another matter of surprise is that this subject is juggled with every now and then without practically solving it. Take the case of the plantations, which exist on irrigation by pumping, have they any trouble in getting what is needed? Have the malinis come here and solved their water problems for them? No. Honolulu is deprived this moment of good water from gross negligence. Six years ago Mr. Young, then Minister of Interior, prepared for conditions as they exist now, by ordering a 3 million gallon pump, to lift water 350 feet high. This pump has been ready for its foundations for over 4 years, and I believe interest has been paid on its cost ever since.

Here we have a pump, built to supply a necessity, and the taxpayer, paying not only in money to keep it out of commission but also in health and perhaps lives; and on top of all, he has to pay his full water rates just the same whether he has water the whole time or only part of the time.

It is up to the consumer to say what he wants and it is up to him to see that he gets it. Here are the pros and cons of the two propositions:

Gravity system requires a large amount of money to be spent at once for water rights, for condemnation of valuable land, for large, expensive and, to some degree, dangerous reservoirs; and last, but not least, impure water, the quantity of which is not guaranteed even by the size of reservoirs.

Artesian well and pump system requires a much less expenditure for wells and pumps than needed for the gravity system; practically no condemnation of land, and a constant supply of clean, pure water.

Now, what do we want?

The stirring up of this subject by bona fide citizens and water consumers should prove more healthful than the stirred up mud flowing through our so-called water system.

Thanking you for the space,
I say: NEXT.

KUPA.

This Lady Started with a 25c. Bottle.

MISS SARAH MACCOMB,
5036 Forrestville Ave., Chicago, Ill.

Danderine

GREW THIS HAIR

And we can PROVE IT.

If you want your hair to grow THICK and LONG

DANDERINE

is the remedy you will be obliged to use.

We have a standing order to wage \$1,000 that it is the only

HAIR TONIC

on the market to-day that will positively stop and cure

Falling Hair and make

HAIR GROW

Average growth 1 1/4 in. per month for twenty consecutive months.

By permission we herewith reproduce photograph of Miss Sarah MacComb, a lady who has lived in Chicago all her life and is well known in the city, especially on the South Side. Her hair before she commenced the use of Danderine would not reach below her waist, while now it touches the floor when she stands erect. This remarkable growth is the result of using Danderine, the greatest of all hair and scalp tonics, regularly as a dressing.

It Gave Her Hair New Life

and will do the same for you if you give it a fair trial. Danderine puts new life and vigor in both the hair and scalp. It makes the hair fluffy, silky, and there seems to be no limit to the growth it will produce. There is no other that can be compared to it, as it is founded on new ideas altogether.

SHE IS WILLING TO SWEAR TO IT.

By request of Miss MacComb we reproduce the following letters:

KNOWLTON DANDERINE CO., Chicago, Ill.
Gentlemen:—I am writing you to let you know that you are now running showing my picture, that I am sending you to let you know that I used Danderine for twenty consecutive months and the average growth of my hair was one and one-fourth inches per month, making a total of twenty-five inches in twenty months. You are at liberty to use this letter underneath my picture, and by so doing will save me the trouble of answering the large number of inquiries which I am receiving daily. Sincerely,
SARAH MACCOMB.

NOW at all drugists in three sizes, 25 cents, 50 cents and \$1.00 per bottle.

To show how quickly Danderine acts we will send a large sample free by return mail to anyone who sends us advertisement to the Knowlton Danderine Co., Chicago, with their name and address and ten cents in silver or stamps to pay postage.
